DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Justin Liu (Reg. No. 51959) on 10/14/05.

The application has been amended as follow:

Claims 21-24 have been canceled.

Election/Restrictions

This application contains claim groups directed to the following patentably distinct species of the claimed invention:

Group	Invention
I.	Claims 1-20, and 25, drawn to method, underperforming region is layout sensitive, and adjusting the fabrication process.
II.	Claims 21-24, drawn to system, monitoring performance, and the wafer for interfacing between the tester and wafer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an

Art Unit: 2825

allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

During a telephone conversation with Justin Liu on October 14, 2005 a provisional election was made without traverse to prosecute the invention of group I, claims 1-20, and 25, and cancel group II. Claims 21-24.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

1. Claims 1-20, and 25 are allowed because the prior art does not teach or suggest a method for monitoring and improving a fabrication process for integrated circuits comprising: determining if the at least one underperforming region is layout sensitive and responsive to the step of determining, adjusting at least one of layout of the at least one of the plurality of configurable devices and the fabrication process wherein if the at least one underperforming region is layout sensitive, the step of adjusting comprises adjusting the layout of the at least one of the plurality of configurable devices; and wherein if the at least one underperforming region is not layout sensitive the step of adjusting comprises adjusting the fabrication process, and including all of the features as recited in combination.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Art Unit: 2825
